

PRESS RELEASE

EXCITING CHANGES AT EAST BRIGHTON GOLF CLUB

East Brighton Golf Club members have approved a scheme to demolish the existing 83 year old Club House and replace it with a brand new modern building.

It is proposed that this exciting project will provide a fantastic new clubhouse with many additional features to further enhance the golfing, social and business experience to be found at East Brighton.

From the balcony terrace and the main function areas there will be superb panoramic views of the golf course, the English Channel and the South-downs. Inside you will find stylish social, meeting and function areas that can be easily re-arranged to accommodate a wide range of golfing and social events, as well as being available for business and private function use.

There will be provision for a fully equipped professional shop with associated in-door practice facilities, a golfer's gymnasium including male and female saunas, trolley storage and battery charging facilities, motorized buggy storage and provision for visiting golfer's overnight accommodation.

Agreement as been reached with the developer for continued usage of the existing club house, while the new facilities are completed, minimizing any disruption to the club's activities.

It is estimated subject to Planning Approval, that work will start in approximately the spring of 2009. *Existing members and new member's joining before work commences, will be given a financial incentive to compensate for any inconvenience during the period of construction. (*Loyalty scheme details are available on request.)

This is a very exciting time for the 115 year old Brighton based golf club, who's Management Committee are endeavoring to provide the very latest and best facilities for their members and visitors for the future.

Initial plans are now on display in the Oak Lounge at the club house.

We will be arranging members' consultation sessions and regular updates to ensure everyone is kept fully apprised of progress.
